

Decision Center for a Desert City/Global Institute of Sustainability Roundtable

Featuring

Dr. Jackie King, University of Cape Town, South Africa

Jackie King, a freshwater ecologist and Principal Research Officer in the Freshwater Research Unit, University of Cape Town, South Africa, has 30 years of research experience on the rivers of southern Africa. An internationally recognized expert on environmental flows, Dr. King has authored over 140 scientific papers and reports, and has served as an international consultant and numerous agencies, including the World Bank, World Conservation Union (IUCN), and World Commission on Dams.

King visited DCDC on August 8, 2006, for a science roundtable featuring a discussion of possible collaborative opportunities. Presenters included Dr. King, ASU VP for Research and Economic Affairs Jonathan Fink, Grady Gammage of the Morrison Institute for Public Policy, Rita Maguire of Think AZ, DCDC Co-director Pat Gober, and DCDC scientist Tim Lant. Discussants included numerous DCDC scientists, representatives from the University of Arizona, and visitors from many other public and private Arizona institutions. King's visit to Arizona was the last of a series that included stops in Costa Rica and Guatemala as part of an effort to raise public awareness of the diverse set of approaches that different countries are taking to address increasing water scarcity and growing human populations.

Dr. King will visit ASU and DCDC in conjunction with a congressional roundtable in Tucson and invited lecture at the University of Arizona on August 9.

Agenda

August 8, 2006

ASU Decision Center for a Desert City
21 East Sixth Street, Suite 126 B
Tempe, AZ 85287-8209

- | | |
|-------------|---|
| 9:00 - 9:10 | Welcome
