**Table 1:** Summary Statistics By Pilot

Pilot	Water Use	Temp (F)	Rain (in)	Income	HOuse Value	Ideology Index
Utility A	204	70	2.1	60,056	360,332	68
Utility B	291	67	1.6	99,522	720,944	57
Utility C	360	72	0.8	123,240	973,335	34

**Table 3:** Sample Sizes

Pilot	Start Date	End Date	N: Obs	N: Post-Treat	HHs	Treated HHs
Utility A	2011-09-20	2013-01-01	43,598	15,041	2,233	992
Utility B	2012-06-28	on going	98,929	23,849	3,092	1,545
Utility C	2012-07-26	2013-08-23	671,279	121,209	11,307	1,180

# Treatment effect: Results

- Average treatment effects (95% CI):
  - Utility A: -10.6 gpd (-4.39 to -16.89 gpd)
  - Utility B: -16.0 gpd (-7.51 to -24.58 gpd)
  - Utility C: -4.66 gpd (+2.10 to -11.42 gpd)
- Assuming a program cost of \$10 per household per year (print): **\$2.61 per kgal** saved (Utility A) and **\$1.73 per kgal** saved (Utility B).
- Savings equivalent to raising the first tier marginal price by **14%** and **15%** in Utilities A and B ( $\epsilon = -0.38$ )

(from Utility C's rate sheet)

Tier	Rate/ccf
Low Volume	\$ 0.91
Base Rate	\$ 1.27
Inefficient	\$ 2.86
Excessive	\$ 4.80
Wasteful	\$ 9.84

**Utilities**

- Utility A
- Utility B
- Utility C

Notes: The figure shows the marginal price per ccf of water in each utility. Utility B and Utility C have increasing block rate structures where the marginal price depends on the level of consumption. The baseline level of consumption in Utility B is 172 gallons per day, in Utility C it is an allocation determined at the household level, and in Utility A there is only one tier.

**Table 6:** Heterogeneity: Baseline Water Use

	(1)	(2)	(3)
	Utility A	Utility B	Utility C
TE*Decile 1	-3.6155 (4.5038)	5.6861 (4.2270)	-7.6531 (6.8840)

# Existing conservation programs

Water Conservation Program

**Water & Money**

Gallons of water used in the last two months

Water conservation programs can help you save money on your water bill. By using less water, you can reduce your water bill and help protect the environment.

Matt Bloom  
123 Main Street  
Everytown, USA

- Turn off the tap when brushing your teeth
- Take shorter showers
- Fix leaks promptly
- Use water-saving devices

# Participation before and after treatment

## (a) Utility A

	Pre-treatment (over ~32 months)					p-value
	Treatment	$N_T$	Control	$N_C$	Treatment-Control	
Any Program	0.125	1,023	0.133	928	-0.00742	0.625
Any Rebate	0.0997	1,023	0.0970	928	0.00272	0.840
Home Survey	0.0254	1,023	0.0356	928	-0.0101	0.191
Clothes Washer	0.0420	1,023	0.0474	928	-0.00538	0.566

	Post-treatment (over 14 months)					p-value
	Treatment	$N_T$	Control	$N_C$	Treatment-Control	
Any Program	0.0967	1,013	0.0147	882	0.0820	0.000
Any Rebate	0.0158	1,013	0.0102	882	0.00559	0.288
Home Survey	0.0809	1,013	0.00454	882	0.0764	0.000
Clothes Washer	0.00691	1,013	0.00794	882	-0.00103	0.795

(b) Utility B

	Pre-treatment				Treatment-Control	p-value
	Treatment	$N_T$	Control	$N_C$		
Any Program	0.27	1,604	0.26	1,605	0.0083	0.595
Any Rebate	0.26	1,604	0.25	1,605	0.0083	0.593
Toilet	0.037	1,604	0.042	1,605	-0.0050	0.473
Clothes Washer	0.13	1,604	0.12	1,605	0.0082	0.480

	Post-treatment				Treatment-Control	p-value
	Treatment	$N_T$	Control	$N_C$		
Any Program	0.055	1,501	0.028	1,512	0.028	0.000
Any Rebate	0.049	1,501	0.028	1,512	0.022	0.002
Toilet	0.0100	1,501	0.0053	1,512	0.0047	0.138
Clothes Washer	0.024	1,501	0.021	1,512	0.0035	0.517

# Interaction with existing programs

- Households receiving HWR **8 percentage points** in Utility A to participate in any program, **7%** more likely in Utility B (*random effects logit*).
- In Utility A, more likely to participate in home survey/water audit and a toilet rebate. In Utility B more likely to participate in a rebate.

# Effect on water usage of HWR + participation

- Participation in programs reduces water consumption (i.e. ~25 gpd for toilet rebate, ~35 gpd for water audit); HWR treatment effect declines slightly.
- Suggestive evidence that HWRs:
  - Attract more water-efficient households to request water audit (*bad news*)
  - Attract less water-efficient households to redeem high-efficiency toilet rebate (*good news*)
